

# ATC2

## Flat Type Water Sensing Cable

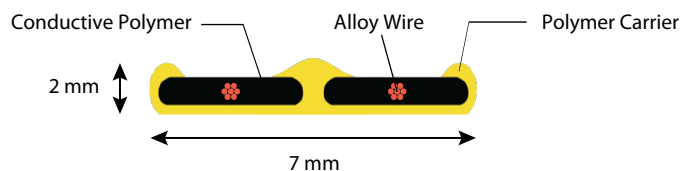

### Product Description

- Cost effective and high reliability, ATC2 sensing cable can be applied to practically all locations with risk of water leakage
- High sensitivity and reliability, compatible with most of the water leak detection panels / modules in the market
- Made up of two parallel electrodes covering with conductive polymers to prevent environmental corrosion
- Special cable form factor design to attain high wear resistance during daily usage

### Technical Specifications

- Dimension: Approx. 7mm wide x 2mm thick
- Wire Impedance: Approx. 13  $\Omega$  / 100m
- Weight: Approx. 13g/m
- Outer Jacket Color: Bright Yellow
- Maximum Exposure Temperature: 80 °C

#### Cross-sectional Profile of ATC2 Water Sensing Cable:
